

AUG 30 2004

FACULTY POSITION – Molecular Carcinogenesis. The Department of Chemistry and Biochemistry at Northern Arizona University (<http://www.nau.edu/~chem/>) invites applications for a tenure-track position in molecular carcinogenesis at the Assistant or Associate level to begin August 2005. The successful candidate will be actively involved in the Native American Cancer Research Partnership with the University of Arizona (<http://www.nativecancer.org>). This position is initially funded by the National Cancer Institute and will involve a membership with the Arizona Cancer Center at the University of Arizona. Potential for collaboration also exists with the recently formed Translational Genomics Research Institute (<http://www.tgen.org>). The first two years of the position will involve no teaching requirements to allow the new faculty member to establish a strong graduate research program. Following this initial period, the individual will be expected to participate fully in the biochemistry curriculum at undergraduate and graduate levels. Qualifications include a Ph.D. in biochemistry or a related discipline, postdoctoral experience in cancer related research, the ability to provide excellent instruction at the undergraduate and graduate level, and willingness to work with a culturally diverse population of faculty, staff, and students. A CV, three letters of recommendation, a brief statement of teaching philosophy and commitment to Native American Student education, and proposed research directions should be sent to: **Chair, Molecular Carcinogenesis Search Committee, PO Box 5659, Northern Arizona University, Flagstaff, AZ 86011-5659.** The search will remain open until the position is filled; however, application review will begin on 9/15/04. This position is subject to availability of funding. *NAU is an Equal Opportunity Affirmative Action Institution. Minorities, Women, Persons with Disabilities and Veterans are encouraged to apply.*
